

Lake Erie Lakewide Management Plan 2000

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

Lake Erie Lakewide Management Plan 2000

Brief description of plan:

The Lake Erie LaMP process began in 1995 with the publication of the Lake Erie LaMP concept paper which provided a framework for building the LaMP. Action plans were developed for the LaMP 2000 to address habitat restoration and protection and PCB's and mercury reduction in the Lake Erie ecosystem. The Lake Erie LaMP proposes a process for developing a comprehensive habitat protection and restoration plan.

Region the plan is located within:

Great Lakes Region

Watershed(s) included within the plan:

L081x , L082x , L083x , L084x , L085x , L086x , L091x , L092x , L093x , L094x , L095x , L096x , L097x , L098x , L099x , L101x , L102x , L103x , L104x , L105x

Area plan covers (in square miles):

square miles

Plan scale:

Multi-state

Plan's lead organization(s):

Lake Erie LaMP Work Group

Plan's Main Contact Information:

No Information Provided

On-line version of plan:

Date of original plan:

2000

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

G

Summary of the goals:

To restore and maintain the chemical, physical and biological integrity of the water of the Great Lake Basin ecosystem.

Plan recommends restoration of specific project sites:

N

Plan includes a discussion of funding sources:

N

Plan addresses long-term protection of restored sites:

Y

Partners included in developing the plan:

Federal
State
Port Authorities/Commissions
Tribes
Business/Industry

Type(s) of public outreach included during plan development:

Held public workshops, meetings, open house, or scoping meetings
Developed a Web site to inform public and/or seek public input
Distributed brochures or other materials
Formed an advisory group(s)
Was subject to a public comment period

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

Y

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

N

Plan addresses monitoring/reference sites for project level monitoring by:

N

The plan discusses or coordinates with other restoration plans covering the same geographic area:

Y

Other plan names:

North American Waterfowl Management Plan, Great Lakes Binational Strategy, Lake Erie at the Millennium Plan

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):

Y

Summary of this habitat information:

By volume, Lake Erie is the smallest of the Great Lakes and the next to smallest in surface area. It is naturally divided into three basins: western (average depth of 24feet), central (60ft) and eastern (82ft).
